Table 1: Main comparison: two experts, TA coefficient 0.5

Protection	Standalone M	No recovery M / S	AGA target M / S	AGA both M / S
Unprotected	99.69	99.37 / 92.50	99.30 / 92.78	99.32 / 91.77
PaRaMS (full)	99.69	8.92 / 9.15	99.30 / 92.79	99.32 / 91.77
Defense 1	99.69	9.80 / 6.70	9.80 / 6.70	9.80 / 6.70
O/B [H]	99.71	78.77 / 62.94	79.53 / 65.82	77.85 / 61.42
A/B [H]	99.65	91.07 / 77.46	85.42 / 75.50	79.20 / 69.84
Defense 2 (structure) [K]	99.69	7.39 / 7.74	10.09 / 6.78	10.09 / 6.78
Defense 2 candidate (failed) [F]	99.69	99.13 / 91.41	99.01 / 91.59	99.04 / 90.51
Defense 2 (task-directed)	99.69	10.98 / 14.32	9.80 / 9.81	9.80 / 9.83

M: protected MNIST; S: partner SVHN. AGA target/both denotes recovery of only the protected expert/both experts. [H] Historical O/B and A/B fail the original complete-task bound; effect references only. [K] Known global symmetry control, not an original method; family-aware public recovery is reported separately. [F] Previous candidate preserves the complete task check but does not provide useful protection. Full PaRaMS is the full-default baseline; parameter scales differ and are not a universal exclusion rule.

Table 2: Task-direction changes and actual classification effects

Fixed model	Task-inside distance	Task-outside distance	Standalone M	TA M	AGA both M
Global permutation [K]	2.69895	11.86048	99.69	7.39	10.09
Previous compensation [F]	0.49964	11.85437	99.69	99.13	99.04
Distance-only pairing	2.96985	12.02151	–	–	–
Task-directed pairing	2.70843	12.03349	99.69	10.98	9.80

Same74 matrices and original expert-minus-base rank32 right singular directions. Squared per-matrix relative norms are summed. These matrix-only distances exclude biases/LN/embeddings and are not the full-model distance. Comparable task-outside distances do not imply comparable protection. [K] Known symmetry; [F] failed efficacy. Distance-only pairing is a parameter ablation,not a published/evaluated alternative; – means no classification run. The task-directed release is selected before images; no novelty claim for standard symmetry/SVD/greedy alone.
